

CLAIMS:

1. A portable electronic apparatus (1) whose housing (2) is provided with a housing part that is constructed as a lever element (3), which is arranged in a wall of the housing and is arranged to cover at least partly a battery pack.

5 2. A portable electronic apparatus as claimed in claim 1, characterized in that the lever element is arranged to bend a material of lower hardness by way of a leverage effect.

3. A portable electronic apparatus as claimed in claim 1, characterized in that the lever element is arranged to open metal closures and is connected to the housing.

10 4. A portable electronic apparatus as claimed in claim 1, characterized in that the lever element is made of metal and/or ceramic.

15 5. A portable electronic apparatus as claimed in claim 1, characterized in that the lever element is constructed as an angled metal plate so as to cover a battery pack.

6. A mobile telephone (1) which includes a housing (2), whose housing (2) is provided with a housing part that is constructed as a lever element (3), which is emedded in a wall of the housing and is arranged to cover at least partly a battery pack.

20 7. A mobile telephone housing, at the rear of which there is provided a lever element (3) which offers protection against shocks and pressure and also protects the accumulator, whereby the housing (2) is provided with a housing part that is constructed as a lever element (3), which is arranged in a wall of the housing and is arranged to cover at least
25 partly a battery pack.
